FAQs

DataTables has most features enabled by default, so all you need to do to use it with your own tables is to call the construction function: `$().DataTable();`.

Searching, ordering and paging goodness will be immediately added to the table, as shown in this example.

CSS

Comments (0)

The Javascript shown below is used to initialise the table shown in this example:

1

\$(document).ready(function() {

2

\$('#example').DataTable();

3

});

Javascript

In addition to the above code, the following Javascript library files are loaded for use in this example:

<https://code.jquery.com/jquery-3.3.1.js>

<https://cdn.datatables.net/1.10.20/js/jquery.dataTables.min.js>
